**DETAILED ACTION**

1. The amendment filed September 9, 2002 has been received and entered.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 11 is rejected under 35 U.S.C. 102(e) as being anticipated by Martyn et al.

Martyn et al. teach a method of managing and processing broker transaction data comprising a means for entering and recording trade data into a server database of a data processing system (110); creating data files in the server database corresponding to the entered data; monitoring modifications and reporting modifications by the data processing system (column 1, line 53- column 2, line 18) (column 3, lines 28-31) (column 4, lines 1-17) (column 6, lines 32-39) (column 8, lines 43-49) (column 11, lines 43-46).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Martyn et al., in view of Carino, Jr. et al.

Martyn et al. have all the features of the invention but lack a secure transmission means. Carino, Jr. et al. teach a secure transmission path (column 20, lines 4-6). It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the teaching of Martyn et al. and Carino, Jr. et al. to have a secure transmission path.

***Allowable Subject Matter***

4. Claims 1-10, 13-48 are allowed.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Minton is cited of general interest.
